Colourful Vertical Flowchart Free AI Browser Publish Share

Update flowchart steps

Mobile Network. Show how a mobile phone moves from one cell to another while maintaining a call. Include these steps in order:
START – Mobile phone is connected to Base Station 1.
Signal Strength Decreases – The user moves away from Base Station 1.
Signal Monitoring – The network checks nearby base station signals.
Handoff Decision – The network selects Base Station 2 with a stronger signal.
Connection Transfer – The call connection is transferred to Base Station 2.
Call Continues – The user continues the call without interruption.
END – Handoff completed successfully.
Use rounded rectangles, clear downward arrows, different pastel colours, a white background, and readable text. Include a simple mobile phone icon and two cell towers labelled Base Station 1 and Base Station 2. Make the diagram neat and suitable for a college Mobile Computing Lab record.

L

Worked for 35s

Implemented Mobile Computing Lab Experiment 6 as a professional handoff flowchart.

Included

- Seven requested handoff stages in the correct order
- Rounded pastel-colored process cards
- Clear downward arrows
- Mobile phone illustration
- Two labelled cell towers
- Weakening and stronger signal indicators
- Movement path from Base Station 1 to Base Station 2
- Readable black text on a white background
- Responsive college lab-record layout

Updated: `src/App.tsx`

Verification: `pnpm run build` passed successfully.

EXPERIMENT 06

Handoff Scenario in a Mobile Network

Maintaining an active call while a mobile user moves between cells

CELL-TO-CELL MOVEMENT

PROCESS DIAGRAM

Handoff Sequence

SEAMLESS TRANSFER

S **START**
Mobile phone is connected to Base Station 1.

01 **Signal Strength Decreases**
The user moves away from Base Station 1.

02 **Signal Monitoring**
The network checks nearby base station signals.

03 **Handoff Decision**
The network selects Base Station 2 with a stronger signal.

04 **Connection Transfer**
The call connection is transferred to Base Station 2.

05 **Call Continues**
The user continues the call without interruption.

E **END**
Handoff completed successfully.
